PROFESSIONAL SUMMARY

Senior AI Engineer with 4+ years of production experience architecting Agentic AI, multi-agent, RAG, and computer vision systems. Currently designing an enterprise orchestration platform for MiSUMi APAC with LangGraph, Amazon Bedrock, EKS, MCP, FastAPI, PostgreSQL, Qdrant, Redis, and Langfuse. Experienced in ReAct agents, HITL, hybrid retrieval, evaluation, observability, distributed AI services, and MLOps. Previously delivered a 4x efficiency gain in retail shelf auditing with a production YOLO/ViT ensemble covering 750+ SKUs.

PROFESSIONAL EXPERIENCE

Senior AI Engineer

Jan 2026 - Present

MiSUMi (Thailand) Co., Ltd. - Bangkok, Thailand

- Architect an enterprise agentic AI platform with LangGraph, FastAPI, Bedrock, EKS, and MCP, targeting up to an 80% operational-cost reduction through customer-service and back-office automation.
- Design multi-agent workflows with master-agent routing, ReAct sub-agents, structured tool calling, checkpoint persistence, conversation memory, and Human-in-the-Loop approval gates.
- Engineer hybrid RAG with Qdrant, Amazon Titan embeddings, BM25 sparse retrieval, and Reciprocal Rank Fusion to ground agents in enterprise knowledge.
- Build distributed AI services with ALB, RDS PostgreSQL, Redis, S3, Redshift, Textract, and Bedrock.
- Implement a secure MCP gateway and Microsoft Graph integrations for orders, shipments, documents, email, Teams, and approvals.
- Develop evaluation and observability with Golden Datasets, LLM-as-a-Judge, Langfuse, OpenTelemetry, Prometheus, Grafana, and CloudWatch; apply fail-closed authorization, idempotency, retries, and tracing.

AI Engineer

Oct 2024 - Dec 2025

MiSUMi (Thailand) Co., Ltd. - Bangkok, Thailand

- Deployed customer-service agents with LangChain, CrewAI, Langfuse, and multi-RAG, automating inquiry handling that required manual routing.
- Built LLM classification pipelines for voice/text analytics and a Sales Recovery Agent for ambiguous transaction data and follow-up timing.
- Created enterprise data infrastructure with Airflow, dbt, and Docker, establishing a centralized BI warehouse.
- Integrated AI services with Power Automate to reduce manual data entry and reporting overhead.

Data Scientist

Jul 2022 - Oct 2024

TSPACE Digital Company - Bangkok, Thailand

- Deployed a PyTorch YOLO + CNN + ViT retail-recognition ensemble achieving 90% accuracy across 750+ SKU classes.
- Reduced shelf-audit time from 45 to 15 minutes per store, a 4x capacity improvement without additional headcount.
- Implemented FAISS similarity, KNN classification, and OpenCV post-processing; analyzed shelf performance with SQL for BI.
- Built Flask REST APIs and managed Docker deployment and Grafana monitoring for the production vision system.

EDUCATION

M.Eng. in Robotics & Computational Intelligence Systems

2024 - 2026

King Mongkut's Institute of Technology Ladkrabang (KMUTL) - Bangkok, Thailand

B.Eng. in Mechatronics and Robotics Engineering

2020 - 2022

Rajamangala University of Technology Tawan-Ok - Thailand

TECHNICAL SKILLS

Programming: Python, SQL, C++

Generative AI / Agentic AI: LangGraph, LangChain, CrewAI, ReAct agents, tool calling, MCP, HITL, prompt engineering, structured outputs, LLM evaluation, LLM-as-a-Judge

RAG / Search: Qdrant, FAISS, hybrid search, vector search, BM25, Reciprocal Rank Fusion, Amazon Titan embeddings, semantic search

Cloud / AI Infrastructure: AWS, Amazon Bedrock, EKS, Kubernetes, ALB, RDS PostgreSQL, ElastiCache Redis, S3, Redshift, Textract

Backend / Distributed Systems: FastAPI, Flask, REST APIs, microservices, async processing, idempotency, retry and timeout strategies

LLMOps / MLOps / Observability: Langfuse, OpenTelemetry, Prometheus, Grafana, CloudWatch, ClickHouse, Docker, Golden Dataset testing, distributed tracing

Data Engineering: Apache Airflow, dbt, PostgreSQL, data warehousing, ETL/ELT, Power BI

Computer Vision: PyTorch, YOLO, CNN, Vision Transformers, OpenCV, KNN, image classification, object detection

Enterprise Integration: Microsoft Graph API, Microsoft 365, Teams, Power Automate, enterprise workflow automation

Spoken Languages: Thai (Native), English (Professional Working Proficiency)

Certifications: Agentic AI - DeepLearning.AI (2025); Deep Learning Specialization - Coursera (2023)
