PROFESSIONAL SUMMARY

Senior AI Engineer with 4+ years of production experience building agentic AI systems, LLM applications, and computer vision pipelines. Currently driving AI transformation at MiSUMi APAC, with a target of 80% reduction in operational cost across regional hubs. Previously delivered a 4× efficiency gain on retail shelf audits via a 750-class YOLO/ViT ensemble deployed to production. Specializes in multi-agent workflows (LangChain, CrewAI, LangFuse), LLM engineering, and end-to-end MLOps.

PROFESSIONAL EXPERIENCE

Senior AI Engineer Jan 2026 – Present

MiSUMi (Thailand) Co., Ltd. — Bangkok, Thailand

- Architecting agentic AI systems across MiSUMi's APAC regional hubs, targeting 80% reduction in operational cost through automated customer service and back-office workflows
- Partnering with Business Architects and senior leadership to scope, prioritize, and deliver AI initiatives aligned with regional business objectives
- Designing and maintaining scalable Data & AI Platform infrastructure to support cross-country operations across Asia
- Mentoring business users in Power BI, SQL, and data pipelines to foster a self-service data culture and reduce analytics bottlenecks

AI Engineer Oct 2024 – Dec 2025

MiSUMi (Thailand) Co., Ltd. — Bangkok, Thailand

- Architected and deployed autonomous AI agents for customer service using LangChain, CrewAI, LangFuse, and Multi-RAG, automating complex inquiry handling previously requiring manual routing
- Engineered a multi-label classification pipeline with LLMs and structured prompt engineering on voice and text data, producing topic-level analytics for business stakeholders
- Built an autonomous Sales Recovery Agent using heuristic inference to resolve ambiguous transaction data and dynamically optimize follow-up timing based on lead-time analysis, improving revenue recovery
- Constructed enterprise data infrastructure from scratch with Apache Airflow, dbt, and Docker, establishing a centralized Data Warehouse for company-wide Business Intelligence
- Delivered RPA workflows (Power Automate) integrated with AI services, eliminating manual data entry and reducing reporting overhead

Data Scientist Jul 2022 – Oct 2024

TSPACE Digital Company — Bangkok, Thailand

- Led visual analytics for retail product recognition; deployed a YOLO + CNN + ViT ensemble in PyTorch achieving 90% accuracy across 750+ SKU classes
- Reduced shop audit time from 45 minutes to 15 minutes per store (4× improvement), expanding field team capacity without additional headcount
- Implemented FAISS vector similarity and KNN classification for rapid SKU lookup and collaborative model functionality
- Analyzed product placement, shelf win-rates, and regional performance from AI-derived data; authored SQL against the Data Warehouse for downstream BI reporting
- Built the production backend with Flask REST APIs and OpenCV-based post-processing; managed deployment via Docker and monitoring via Grafana

EDUCATION

M.Eng. in Robotics & Computational Intelligence Systems 2024 – 2026

King Mongkut's Institute of Technology Ladkrabang (KMITL) — Bangkok, Thailand

B.Eng. in Mechatronics and Robotics Engineering 2020 – 2022

Rajamangala University of Technology Tawan-Ok — Thailand

TECHNICAL SKILLS

Languages: Python, C++, SQL

AI / ML: Agentic AI, Multi-agent Systems, LLMs, Generative AI, Prompt Engineering, RAG, Deep Learning

Frameworks: LangChain, CrewAI, LangFuse, PyTorch, FAISS, Flask, FastAPI

Computer Vision: YOLO, CNN, Vision Transformers (ViT), OpenCV

Data & MLOps: Apache Airflow, dbt, Docker, Power BI, Power Automate, Grafana, Data Warehousing

Spoken Languages: Thai (Native), English (Professional Working Proficiency)

Certifications: Agentic AI — DeepLearning.AI (2025); Deep Learning Specialization — Coursera (2023)
